SUMMARY

Full-stack Developer with frontend orientation, experienced in building production web applications end-to-end using React, TypeScript, and Node.js. Strong in translating product requirements into maintainable systems, reusable UI components, and polished user experiences. Excels at working with AI-assisted development workflows across planning, implementation, testing, debugging, and refactoring, with a focus on speed, code quality, and usability.

EXPERIENCE

Independent Product Developer (Self-employed) 2023 – Present

Tel Aviv, Israel

- Designed and built multiple end-to-end web applications, owning architecture, frontend, backend, and deployment.
- Developed AI-powered workflows for data processing, analysis, and user-facing features across multiple products.
- Implemented asynchronous systems, real-time flows, and external integrations (APIs, scraping, data pipelines).
- Executed full product lifecycle: idea, validation, development, and deployment of working prototypes.

Full-stack Developer 2022 – 2023

Cogniteam – Nimbus, Tel Aviv, Israel

- Designed and maintained a real-time web application for production users using React, TypeScript, and Redux, working closely with backend systems over gRPC.
- Built reusable UI components with MUI5 and Styled-Components, helping establish scalable design patterns across the product.
- Refactored legacy code to improve maintainability and reduce technical debt, enabling faster feature delivery with fewer regressions.
- Applied modern tooling and CI/CD practices to improve development workflows and release reliability.

SELECTED PROJECTS

GapHunter - AI Review Intelligence Tool | Next.js, TypeScript, Convex, TailwindCSS, OpenAI

Built a product analysis tool that transforms unstructured app reviews into structured insights and reports. Designed asynchronous report-generation workflows, user-facing preview flows, and a gated results experience focused on clarity and usability.

YouTube & Media Transcription Editor | Next.js, TypeScript, Supabase

Built a web application for transcribing YouTube videos and media files, including transcript editing, thumbnail extraction, title updates, image replacement, and transcript refinement workflows.

Business Landing Page & Lead Collection System | Astro, Airtable, Email Automation, Vercel

Built a landing page and lead collection flow for a small business, integrating Airtable-based data capture and automated follow-up communication.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, Redux, TailwindCSS, MUI, Styled-Components, HTML, CSS
Backend	Node.js, Express, REST APIs, gRPC, MongoDB, Mongoose, SQL, Supabase, Convex
Tooling	Git, GitHub, Webpack, Vite, Docker
AI-Assisted Dev	Claude Code, GitHub Copilot, AI-assisted planning, implementation, testing, and refactoring

EDUCATION

B.Sc. in Mathematics & Computer Science

Ariel University 2017 – 2020

Full Stack Developer Bootcamp

Netcraft Academy Apr 2021 – Nov 2021

MILITARY SERVICE

Combatant, Kfir Brigade – Haruv Battalion 2009 – 2012
